

Flexible Mold Power and Thermocouple Cables

Athena's new Flexible Mold Power and Thermocouple Cables are available for 5-12 zones in lengths from 10-20', and are produced through an extrusion/corrugation process that produces a seamless, corrugated nylon tube.

Each Cable

- ▲ Features 100% Stranded Wire for Maximum Flexibility and Durability
- ▲ Has Connections that are Fully Tested for Wiring Integrity
- ▲ Special Transition and "Y" Cables are also Available

Flexible Thermocouple Cables
